

[Jcpds Card Software Free Download](#)

The screenshot displays the software's main interface. On the left, a 'Parameters of profile broadening' panel includes 'Editing Caglioti parameters' and 'Computing of convolution filter broadening' sections. The 'Filter' section has checkboxes for 'FWHM (2 θ)', 'Gauss comp', 'Pearson VII exp', and 'Asymmetry', each with a numerical value and control buttons. Below this is a small plot of a single peak. The central area shows a 'Model profile' and 'Actual filtered profile' with a 'Sum' value of 3143. A 'Model zero shift' of 0.015 is indicated. To the right, a 'QUANTITATIVE ANALYSIS' box is present. The bottom right features a 'Distribution Function fitting from experimental or computed pattern model' box. The main plot area shows a complex pattern with multiple peaks and a fitted curve. A small inset plot shows a distribution function fit with a linear trend line.
